SUMMARY

Final-year IT student and full-stack developer with hands-on experience across healthcare, fact-checking, and education platforms. Built and continue to maintain a smart attendance system now in pilot testing at the Cyberjaya campus. Hackathon champion (CityU Fusion Hackathon 1.0) and Hult Prize runner-up (MEDeLIFE). Available for a 4–6 month internship starting May 2027.

EDUCATION

Bachelor of Information Technology

City University — Expected Graduation 2027

Focus: web technologies, UI/UX design integration.

ACHIEVEMENTS

- Champion — CityU Fusion Hackathon 1.0 (FactShield)
- Runner-up — Hult Prize (MEDeLIFE)

EXPERIENCE

Percentage (Big Dreamers Sdn Bhd) — Freelance Web Developer

May 2026 – Present

- Developing the company website for Percentage, a clothing brand under Big Dreamers Sdn Bhd (in progress)

OneStep (onestepmy.com) — Freelance Web Developer

Mar 2026 – Present

- Designed, developed, and deployed the platform end-to-end — full-stack ownership from front-end UI through backend and database (Mar 2026 – May 2026)
- Continue to maintain and update the site post-launch

YS Study Focus — Freelance Web Developer

Nov 2025 – Present

- Built and launched a full end-to-end website for an educational consultancy, from planning through deployment, with a mobile-first responsive design (Nov 2025 – Jan 2026)
- Continue to provide ongoing maintenance and updates

Evolution — Marketing Manager → Assistant Incharge

Aug 2024 – Apr 2025

- Marketing Manager (March 2024 – Jan 2025): Developed strategic promotional plans, monitored campaign performance, and mentored junior staff
- Assistant Incharge (Jan 2025 – Apr 2025): Managed departmental operations, optimized team workflows, and ensured successful delivery of marketing campaigns

PROJECTS

FactShield — AI & Blockchain-Powered Fact-Checking Platform

Full-Stack Developer & Feature Planner ·

Champion, CityU Fusion Hackathon 1.0

- Built core platform features combining AI-based content verification with blockchain for tamper-proof records

MEDeLIFE — Healthcare Platform (Final Year Project)

Full-Stack Developer · Solo Project

Runner-up, Hult Prize

- Solo-built a full-stack medical records platform with role-based access control and secure digital medical records
- Integrated the Gemini API for AI-powered patient insights and added blockchain-based record verification
- Designed a patient, doctor community feature for care coordination and communication

Smart Attendance System — University Group Project (Team of 4)

- Developed the system's core features and continue to maintain it; currently in pilot testing at the Cyberjaya campus
- Designed and built the admin dashboard, end-to-end
- Implemented and updated the attendance policy logic
